### DETAILED ACTION

Claim(s) 1-8 is/are pending.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Miura et al. (US 6,027,669).

Claims 1-8 are rejected on the grounds as stated in the Office Action of 16 December 2005. With respect to the amended limitation that the electrically conductive fluid would be chemically abrasive to the layer on the substrate, the Examiner asserts that water would inherently be chemically abrasive to a layer on a substrate because water is a corrosive substance.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1742

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kambe et al. (US 2001/0000912 A1).

Claims 1-2 and 5 are rejected on the grounds as stated in the Office Action of 16 December 2005. With respect to the amended limitation that the electrically conductive fluid would be chemically abrasive to the layer on the substrate, the Examiner asserts that water would inherently be chemically abrasive to a layer on a substrate because water is a corrosive substance.

### ***Response to Arguments***

Applicant's arguments filed 10 March 2006 have been fully considered but they are not persuasive.

Applicant states that the cited references do not describe a fluid that is chemically abrasive. However, the applicant does not provide any rationale as to why the fluids of the cited prior art would not be considered chemically abrasive.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
